

**Alcove***Tea light Candle Holder*

This tea light candle-holder is inspired from niches in traditional Indian architecture, where recessed pockets in the walls prevented lamps from blowing out in the wind. Made with clay using a refractory brick composition, it has distinct surface textures, with the crumbled edges suggestive of the qualities and nature of bricks. Defined by the extents of the light, the Alcove vanishes when lit in the dark, with only a warm glow visible within the soft form of its spatial geometry.

Use & Care

We recommend smokeless and sootless tea light candles. In case soot collects in your Alcove, use a dry cloth first and then a damp cloth to wipe it clean.

Your Alcove and candle holder may get hot when used long hours. Please handle with care, and keep out of reach of children during storage and use.

Brass surfaces are left exposed to age naturally through use. If desired, the original polish can be restored using a brass-specific cleaning agent and a soft cotton cloth.
