

Topologic Bowls

A collection of shallow vessels derived from a shared geometric logic, each begins as a cylindrical volume. The bowl is formed by removing a spherical segment and its exterior is faceted to meet at an inscribed polygonal base. Form and function are derived from variations in material and the three basic parameters: diameter, height, and base shape. In select wooden pieces, natural imperfections are resolved with carefully inlaid geometric inclusions, honouring the life of the material.

Top
Ø150mm, teak and Ø200, rosewood

Dimensions (in mm)

Material & Finish

Body

Teak, Natural

Mahogany, Natural

*Ø300 bowl available in limited quantities

*Rosewood bowls are available on request

*Finished using food safe oils

Use & Care

We find beauty in the marks of unique character – subtle variations of grain, figure, and texture inherent in materials that deepen through use and patinate over time.

Oiled wood should be wiped with a dry cotton cloth as required. Periodically, apply a generous coat of oil with a clean cotton cloth, let it soak for an hour, then wipe off the excess.

For more details, please refer to our [material care guide](#).
